Discount vs Profit by Sub-Category

Data Story & Key Insights

Between 2014 and 2017, Superstore made total sales of 2.30M and a profit of 286K, a profit margin of 12.5%. Sales grew every year, from 484K in 2014 to 733K in 2017. However, the Furniture category made 742K in sales but only 18K in profit (a 2.5% margin), while Technology (17.4%) and Office Supplies (17.0%) perform much better. A major reason is Tables, which lost 17.7K, and Bookcases is also running at a loss. By region, Central has the weakest margin at 7.9%, compared to 14.9% in the West.

Business Recommendation: Reduce discounts on Tables and Bookcases and review their pricing. Also focus on improving profit in the Central region.
